

**A
PROJECT REPORT ON**

ONLINE BLOG PUBLICATION TOOL

**SUBMITTED IN
PARTIAL FULFILLMENT OF
DIPLOMA IN ADVANCED COMPUTING (PG-DAC)**

BY

**AHIRE SHANTANU KANCHAN
ARABUNE RAHUL VISHWAS
JAISWAL KAPIL NARENDRA
JOSHI ABHISHEK MAHESH**

**UNDER THE GUIDENCE OF
MS. PRIYANKA RANGOLE**

AT

**SUNBEAM INSTITUTE OF INFORMATION TECHNOLOGY,
Karad**

**SUNBEAM INSTITUTE OF INFORMATION TECHNOLOGY,
Karad**

CERTIFICATE

This is to certify that the project

**ONLINE BLOG
PUBLICATION TOOL**

Has been submitted by

**AHIRE SHANTANU KANCHAN
JOSHI ABHISHEK MAHESH
JAISWAL KAPIL NARENDRA
ARABUNE RAHUL VISHWAS**

**In partial fulfillment of the requirement for the Course of PG Diploma in
Advanced Computing (PG-DAC March 2024) as prescribed by The
CDAC ACTS, PUNE.**

Place: Karad

Date: 14-AUG-2024

Project Guide

PRATIK NINGANUR
Course Coordinator

ACKNOWLEDGEMENT

A project usually falls short of its expectation unless aided and guided by the right persons at the right time. We avail this opportunity to express our deep sense of gratitude towards **Mr. Prashant Lad (Center Coordinator, SIIT, Karad)** and **Mr. Pratik Ninganur (Course Coordinator, SIIT, Karad)**.

We are deeply indebted and grateful to them for their guidance, encouragement and deep concern for our project. Without their critical evaluation and suggestions at every stage of the project, this project could never have reached its present form.

Last but not the least we thank the entire faculty and the staff members of Sunbeam Institute of Information Technology, Karad for their support.

AHIRE SHANTANU

JOSHI ABHISHEK

1. INTRODUCTION TO PROJECT

The web based “Online Blog Publication Tool” project is aimed at giving platform to the user to express his/her thoughts and views in the form of blog. The user can showcase his/her writing skills and innovative ideas through blogposts. This application enables the user to see other users’ blogs. The bloggers can communicate i.e. share their thoughts on the blog subject through comments.

This blog publication tool provides role based functionalities. The whole application is managed by the Admin. The admin performs ‘admin role based functionalities’. Blogger and Commenter have their own functionalities. All the functionalities are elaborated in this document.

All the blogs and comments below which have been published are visible to all the users irrespective of their roles. But editing or deleting blogs and comments can be done only by the respective authors.

When any unforeseen conflicts arise, the admin reserves rights to delete any blog or blogger or commenter. He only has right to decide the categories under which the blogs are to be written. Blogs are to be published under specific categories.

In a nutshell, this application envisions free flow of thoughts from the people, for the people and by the people.

2.REQUIREMENTS

2.1 FUNCTIONAL REQUIREMENTS

2.2 Registration and creation of user profile

The user has to get registered first to access this web application. The user is given three choices to get register. Although there are three choices, the admin user is fixed, hence practically when the application will be open to all, the user can register either as a blogger or a commenter.

The user will be asked to provide basic personal information in registration form –

First name,
Last name,
Email id,
Password,
Date of birth,
Role (Blogger or commenter),
City.

The system will make an entry into database. This will be the basic user profile.

2.3 Blogs APIs

In this API, registered blogger can create his own blog. After login, blogger is redirected to his home page. On the home page navbar, categories are provided. Blogger will choose category under which he will be writing his blog. The blog, after finishing writing, will be saved inside database. The blog will have foreign keys as author id and category id.

This API will be accessed by blogger. The blogger only has an authority to create a blog under his account. Created blog can be edited by the author i. e. blogger only. He/her can delete the blogs written by him/her only. In case of some conflicts, admin has an authority of seeing all the blogs and delete concern blogs. The admin cannot edit any blog.

2.4 Category APIs

The categories are visible globally i. e. all users, irrespective of their role, can see all the categories. But adding new category, editing or updating existing category or deleting existing category can be done only by the admin as he is the manager of the whole app.

2.5 Comments APIs

The registered commenter can read the blogs and communicate with the blogger i.e. can give his feedback or all the readers in the form of comments. These comments are visible to all. The author of the comment only can edit his comment. The admin has an authority to delete any comment.

2.6 Base Entity

Every entity is extended from base entity.

3. DESIGN

3.1 Database Design

The following table structures depict the database design.

Table1: Base Entity

Field	Type	Null	Key	Default	Extra
id	bigint	NO	PRI	NULL	auto_increment
created_on	datetime(6)	YES		NULL	
updated_on	datetime(6)	YES		NULL	

Table2: Users Table

Field	Type	Null	Key	Default	Extra
id	bigint	NO	PRI	NULL	auto_increment
created_on	datetime(6)	YES		NULL	
updated_on	datetime(6)	YES		NULL	
first_name	varchar(30)	YES		NULL	
last_name	varchar(30)	YES		NULL	
email	varchar(30)	NO	UNI	NULL	
password	varchar(255)	NO		NULL	
role	varchar(15)	YES		NULL	
city	varchar(30)	YES		NULL	
dob	date	YES		NULL	
image	longblob	YES		NULL	

Table3: Posts Table

Field	Type	Null	Key	Default	Extra
id	bigint	NO	PRI	NULL	auto_increment
created_on	datetime(6)	YES		NULL	
updated_on	datetime(6)	YES		NULL	
content	varchar(255)	YES		NULL	
description	varchar(255)	YES		NULL	
title	varchar(50)	YES	UNI	NULL	
category_id	bigint	NO	MUL	NULL	
auther_id	bigint	NO	MUL	NULL	

Table4: Category Table

Field	Type	Null	Key	Default	Extra
id	bigint	NO	PRI	NULL	auto_increment
created_on	datetime(6)	YES		NULL	
updated_on	datetime(6)	YES		NULL	
cat_name	varchar(30)	YES	UNI	NULL	
description	varchar(255)	YES		NULL	

AUG 07, 2024	After Ensuring Proper Functioning the Required Validations were Implemented	Coding Phase and Unit Testing	Module Integration was done by the Project Manager
AUG 08, 2024	The Project was Tested by the respective Team Leaders and the Project Manager	Testing Phase (Module Testing)	--
AUG 09-10, 2024	The Errors Found were Removed	Debugging	The Project was complete for submission
AUG 14, 2024	Final Submission of Project		

6. PROJECT MANAGEMENT RELATED STATISTICS

DATE	WORK PERFORMED	SLC Phase	Additional Notes
MAY 04,2024	Project Allotment and User Requirements Gathering	Feasibility Study	Our team met Sunbeam mentors
MAY 08,2024	Initial SRS Document Validation And Team Structure Decided	Requirement Analysis (Elicitation)	The initial SRS was presented to the client to understand his requirements better
MAY 18,2024	Designing the use-cases, Class Diagram, Collaboration Diagram, E-R Diagram and User Interfaces	Requirement Analysis & Design Phase	Database Design completed
JULY 29,2024	Business Logic Component design Started	Design Phase	-----
JULY 30,2024	Coding Phase Started	Coding Phase	70% of Class Library implemented.
AUG 03,2024	Implementation of Web Application and Window Application Started	Coding Phase	Class Library Development going on.
AUG 04, 2024	Off	Off	Off
AUG 06, 2024	Implementation of Web Application and Window Application Continued	Coding Phase and Unit Testing	Class Library Modified as per the need.
AUG 07, 2024	Implementation of Web Application and Window Application Continued	Coding Phase and Unit Testing	--

5. TEST REPORT

GENERAL TESTING:

SR-NO	TEST CASE	EXPECTED RESULT	ACTUAL RESULT	ERROR MESSAGE
1	Register Page	Redirected to Next page	OK	Nothing
2	Login Page	Pop-up will come	Ok	Please enter username and password again .
3	Reset login	Only users password will be reseted	Ok	Nothing
4	Add Category	Gives category name and description	Ok	Nothing
5	Post Blog	Add title and content under existing category	Ok	Nothing
6	Post comment	Post comment under any blog	Ok	Nothing
7	Update Category	Edit title and description of existing category	Ok	Nothing
8	Delete comment	Comment deleted	Ok	Nothing
9	Update post	Edit existing Post	Ok	Nothing
10	Logout	It will logout from user profile.	Ok	Nothing

Comments

- Comment each type, each non-public type member, and each region declaration.
- Use end-line comments only on variable declaration lines. End-line comments are comments that follow code on a single line.
- Separate comments from comment delimiters (apostrophe) or `//` with one space.
- Begin the comment text with an uppercase letter.
- End the comment with a period.
- Explain the code; do not repeat it.

4. CODING STANDARDS IMPLEMENTED

Naming and Capitalization

Below summarizes the naming recommendations for identifiers in Pascal casing is used mainly (i.e. capitalize first letter of each word) with camel casing (capitalize each word except for the first one) being used in certain circumstances.

Identifier	Case	Examples	Additional Notes
Class	Pascal	User, Comment, Category, BaseEntity	Class names should be based on "objects" or "real things" and should generally be nouns . No ‘_’ signs allowed. Do not use type prefixes like ‘C’ for class.
Method	Camel	getDetails, updateUser	Methods should use verbs or verb phrases.
Parameter	Camel	firstName	Use descriptive parameter names. Parameter names should be descriptive enough that the name of the parameter and its type can be used to determine its meaning in most scenarios.
Interface	Pascal with "I" prefix	Disposable	Do not use the ‘_’ sign
Property	Pascal	ForeColor, BackColor	Use a noun or noun phrase to name properties.
Associated private member variable	_camelCase	_foreColor, _backColor	Use underscore camel casing for the private member variables
Exception Class	Pascal with "Exception" suffix	WebException,	

E-R and Class Diagram:
